Description:

The Wedge Pressure Catheter is made of extruded radiopaque polymeric tubing with two lumens in the main body of the catheter. The inflation lumen at its distal end opens into a latex balloon which is attached to a tapered tip. The injection/pressure lumen terminates at the very end of the catheter distal to the latex balloon.

Packaging:

Each catheter is packaged in a sterile peel-pack tray

Catheters Length Marking:

Each catheter has clear, easy to identify increment markings every 10 cm along catheter body.
